

Mobile Home Weatherization

BPI CEU's: 3.25

Prerequisites: None

Description:

It is widely believed that there is limited potential for energy savings in mobile homes when the reality is that there are energy savings opportunities that often get overlooked. This two-day class will cover the unique characteristics of mobile home construction, find the necessary guidance to perform weatherization measures properly and define the techniques and strategies necessary for successful mobile home weatherization.

Learning objectives:

By attending this session, participants will be able to:

- Recognize mobile home specific tools and requirements
- Identify mobile home specific health and safety concerns
- Review air sealing techniques specific to mobile homes
- Address duct system sealing, repairs, and diagnostics
- Determine appropriate mobile home retrofit insulation techniques and options
- Exercise general mobile home best practices
